

SCREW CONVEYOR

The Runarsson screw conveyors are designed for transporting various types of loose materials with a maximum moisture content of 35%. The design of this type of conveyors allows direct connection to the RFF and RFU screw out-feeders used in silos or stokers.

The compact design of the conveyor allows easy setting, adjustment and control of the mass flow rate.

The conveyor is made of corrosion, wear and high temperatures resistant material.

Advantages:

- cost-effective solution
- reinforced construction
- high resistance to wear and corrosion
- closed construction, dustproof
- dustproof bearings
- easy operation and maintenance

SCREW CONVEYOR

Technical Data 220T

Type	T 12	T 15	T 24	T 48
Capacity m ³ /h at 50Hz	1.9	3.2	3.8	7.7
Drive rating 4 kW	0.37	0.75	1.1	1.5
Fuel moisture content	MAX. 35%			
Fuel size	30 x 30 x 30 mm.
