

## Straw divider

The Runarsson straw divider is a specially designed machine that loosens and tears pressed under high pressure straw bales, which ensures controlled straw feeding to the furnace. This machine is equipped with an automatic self-cleaning system.

The sprinkler system, activated when the pre-set temperature is reached, protects the straw divider from potential fire.

Regular and even feeding of fuel ensures high efficiency of the straw-fired boiler plant.

### Advantages:

- low energy consumption
- low risk of fire
- no need to sharpen or change the teeth of the straw shredder
- tight fire protection lock
- automatic cleaning function
